Combining legal expertise with tech-driven solutions, Rajah & Tann Technologies, Rajah & Tann Cybersecurity and Rajah & Tann Asia provide holistic risk management, in four key areas:

REGULATORY | COMPLIANCE

Spanning across more than ten countries across Southeast Asia, our team of lawyers at Rajah & Tann Asia have the cross-industry and multi-jurisdictional expertise to identify potential gaps and provide legal guidance, ensuring your business is compliant with the latest legal and regulatory requirements. By pairing with technical services from Rajah & Tann Technologies and Rajah & Tann Cybersecurity, we provide in-depth multi-disciplinary solutions to address compliance gaps, including anti-money laundering platform, technical compliance reviews and compliance training.

DATA GOVERNANCE

As businesses today heavily rely on data, it is crucial for businesses to have an effective and responsible data governance to maintain a competitive edge. Our specialist multi-jurisdictional data protection and privacy team helps clients shape their data governance framework in accordance with their business needs and prevailing regulations, so they can maximise their data potential and seize opportunities.

OPERATIONAL EFFICIENCY

By targeting problem statements, ideating possibilities and scoping initiatives, Rajah & Tann Technologies helps clients make better use of technology to mitigate legal risks, improve efficiency and reduce costs in their business processes through the implementation of digital risk management solutions and low code automation tools.

CYBERSECURITY

Through Rajah & Tann Cybersecurity, we offer end-to-end services that cover the entire risk management lifecycle in our clients' operations and ensure they maintain a robust cyber security strategy, including comprehensive pre and post incident security services, such as security audit, incident response and standby, vulnerability assessments and penetration tests.

Our comprehensive suite of digital risk management solutions include:

Secured Enterprise Content Management
