

# Human-Centric Phishing Protection & Training

Reduce your human cybersecurity risk through behavioural change

Train employees to do the right thing when encountering phishing attacks to ensure their readiness when email-based attacks break through technical protections.

Leveraging AI and machine learning, innovative education techniques, and maximising employee engagement, we provide a results-oriented, human-centric cyber threat protection and employee education solution in a single fully automated package.

**Humans**  
continue to be

**#1**  
source of risk  
responsible for

**82%**  
of data breaches

## Protect

Change employee behaviour to mitigate real risk. Stay at the cutting edge of an evolving threat landscape.

## Detect

Turn real threats into instant learning. Use positive, people-first strategies to drive engagement.

## Respond

Neutralize attacks with limited resources. Harness up-to-date threat data from a global sensor network.

## Key Benefits

**Transform employees into a human threat detection engine** through a personally optimized behavior change solution.

**Bridge the gap between security operations and employee workforce** by equipping everyone with the skills and tools to report malicious emails and get instant threat assessments.

**Maximize employee participation** with short learning moments; deliver training when users are most engaged.

**90%+**

Reduction in failure rates

**90%+**

Engagement rates

**75%+**

Detection rates

## Meet Compliance Requirements

Our training library offers pre-built, customizable content packages designed to meet key regulatory requirements.

## Up-to-date Training Library

Meet all your compliance and awareness requirements with a constantly updated training library. For specific needs, leverage our powerful generative AI to craft custom-tailored content.

## Target Training Delivery

Allow our advanced algorithm to manage the delivery of your uploaded content to the appropriate audience, when needed.

## Unlock the Potential of Generative AI

Seamlessly generate new training materials using the advanced features of our generative AI content editor.

## Why Choose Us?

Our approach strengthens the human element of cybersecurity, often the weakest link. By continuously educating and engaging your employees, we reduce the risk of phishing attacks, ensuring your organisation remains resilient against evolving threats.

## Our Solution

**Visualize and communicate human risk**

Use **dashboards** and **in-depth reports** to evaluate and communicate human risk.

**Prioritize and take action**

**Mitigate** true risk by department, region, or job function to impact people's learning and behaviour.

**Prepare employees for the latest attacks**

Build resilience with realistic training based on the latest threats.

**Guide users on a personalized path to resilience**

Simulations are automatically customized by skill, language, role and location.

**Drive engagement**

Gamification makes training fun and rewarding.

**Use AI to neutralize threats**

Combine employee reports with threat intelligence to stop breaches before they happen.
