AI-Assisted Features

Document Integrity Checker
Checks contract integrity and reduces risk by integrating consistent legal language, risk management, and due diligence into every agreement.

Contract Data Extraction
Extracts crucial terms and clauses to enhance reporting. Automated data entry of precise data points, and streamlines reporting.

Contract Compliance Review
Compares contracts against compliance standards and promptly flags and alerts discrepancies to assist in timely compliance monitoring.

Contract Chatbot
Enhances user experience by providing immediate answers to contract specific natural language questions, ensuring round-the-clock support, swift problem-solving, and increased productivity.

Fast track your contracts, keep everyone on the same page.

Automate and decentralise standard contract execution. Facilitate seamless cross-party communication with internal and external deal collaboration rooms.

Track contract versions and changes with automatic redlining.

Collaborate internally within your teams or negotiate externally with your counterparties using the latest version of your contract. Powered by our proprietary AI, automated redlining helps you easily identify any changes made throughout contract versions, driving transparency and efficiency.

Sign on-the-go and keep an eye on each contract you sign.

Generate and sign unlimited contracts, even on-the-go using digitally certified signatures that are admissible in court. Our integrated workflows and audit trails also provide you a higher level of security, knowing that you are signing the final version of your contracts.

# Manage all your contract-related tasks and workflows with one single source of truth.

Designed for seamless collaboration between business and legal teams, including task and workflow management. Communicate seamlessly with everyone in the platform while tracking all tasks arising from your contracts — all in one place.

Track your agreements' key terms and obligations using reminders and notifications.

All agreements processed can be tracked based on their key terms and obligations with minimal input. With automated alerts for every key milestone, never miss the renewal or expiry of a contract — ensuring that you are always up to speed.

Unlock valuable contract data and uphold efficiency with process metrics.

Track your contract data in real time, uncovering insights so that you can make more informed and intelligent business decisions. Generate and export data in a CSV format or use our integrated analytic tool to analyse all your contract metadata. We also offer reports on process metrics like the average time spent per contract, helping you identify contractual bottlenecks to optimise your processes.
