

Innolex helps organisations manage legal and digital risk by automating services and processes, structuring and centralising legal data, and simplifying contract creation and management.

Compliance Automation

We deliver platform-based compliance solutions that leverage intelligent automation to reduce false positives, reduce the costs of conducting tasks, and make compliance more affordable to businesses. Our low code solutions provide the framework to deploy compliance programs globally from a single point of coordination.

Third Party Cyber Risk

We automate cyber risk rating of enterprise suppliers and vendors. We provide global AI-automated cyber-assessments for procurement, and for ongoing monitoring of appointed vendors.

Internal Cyber Risk

We help organisations reveal hidden risks. Our AI-automated engines simulate and report on phishing attacks, analyse staff responses, and audit and enforce password safety across internal IT infrastructure systems.

DIGITAL RISK MANAGEMENT OFFERINGS

Third Party Cyber Risk Monitoring

Efficient, automated assessment and monitoring of your 3rd party digital suppliers. Prioritise your risk team by automating regular checks. Assist vendor remediation with detailed reports.

AI-Enabled Phishing Protection

Motivate staff to recognise and report phishing to become your greatest cyber-protection asset. Highly automated, central and global, solution that tailors phishing simulations to languages, to job-profiles, and to the sophistication of users.

Enterprise Password Audit and Enforcer

Assess password safety, streamline password safety enforcement with an on-premise appliance solution. Detects and prevents internal system passwords that are duplicated, leaked, crackable, or otherwise non compliant to best practices.

AML-CFT Compliance

Low cost automated compliance solution for searching details of people, companies, and ships. Decentralise your AML-CFT compliance: monitor the searches conducted by business groups - locally and globally.

Contract Automation

Our contract automation solution simplifies contracting to scale up execution rates, gain confidence of consistency through centralised and managed workflows covering the full contract lifecycle from negotiation to renewal and onward. Facilitates milestone alerts, obligations reporting, and analytics to drive business intelligence.

Enterprise Knowledge Management

We help organisations review enterprise knowledge systems and processes, leverage AI, and optimise available resources and solutions that can grow within the enterprise landscape.
