

Online Compliance Training

Transform learning and mandated training into an organisational advantage.

A SINGLE SOLUTION FOR COMPLIANCE TRAINING

The platform combines a continuously updated library of customizable legal and safety compliance content with purpose-built technology and value-added services for total compliance coverage. And it's all powered by an immersive platform designed to make learning easier, more accessible, and more effective.

Leverage multiple styles of instruction — including videos, scenario-based learning, interviews, text, and more — to reach every employee. Add your own company-specific policy documents and non-instructional videos with self-service course configuration tools. Get automatic content updates and product enhancements as soon as they're available.

Execute a mature compliance training program for all staff, guided by the latest best practices for employee development and training delivery.

CONTENT AND TECHNOLOGY AT YOUR FINGERTIPS

- Access on-demand **AI-powered** eLearning platform with mobile app available
- **24/7 cloud access** to training content library of 10,000+ modules (subject to content collection subscribed)
- **Multiple course formats:** videos, e-books, live bootcamps, AI scenario simulations, practice labs, certification prep, etc.

Key Features

USER-CENTRIC DESIGN

- Communicate key compliance initiatives and regulatory requirements to employees with various learning modes and training features
- Employees may access courses from desktop or mobile devices in their preferred language
- View training assignments through onscreen notifications with approaching deadlines prominently displayed

COMPREHENSIVE AI INTEGRATION: ENHANCING LEARNING & DEVELOPMENT

- Personalizes learning paths based on user profiles, search behavior, and skill assessments
- Generates personalized learning paths from Skill Benchmark Assessments and user interests
- Recommends content based on user activity and common consumption sequences
- Enhanced search relevance capabilities with AI models like Google's BERT and Meta's intelligent recommendation
- Automated re-engagement notifications encourage learners to revisit relevant content.
- Integration with Amazon Polly and Transcribe for natural text-to-speech and speech-to-text functionalities

SCENARIO-BASED AI CONVERSATION SIMULATOR

- Scenario-based AI conversation simulator provides a safe space for learners to practice new skills through interactive, scenario-based content, and learners can choose roles and respond to AI prompts
- After each conversation, learners receive adaptive personalised feedback through evaluation of their performance, highlighting areas for improvement and recommending content for immediate remediation
- Enables real-time practice using varied scenarios and behaviours, helping learners think on their feet and build confidence
- Track learner engagement, behaviours and modes within the AI conversation simulator through admin dashboard
- Accessible via mobile app for on-the-go skill development

What can the Platform do for your Organization?

- Unite your entire learning program under one platform, allowing for meaningful data collection to connect learning with business performance.
- Deliver an enhanced user experience to improve learner engagement.

Need Bespoke Content?

Our team of instructional designers and content developers work closely with top experts from the Rajah & Tann Asia network and various industries to provide engaging training content in various areas of law and compliance.
